PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student with a strong interest in Software Engineering, Artificial Intelligence, and scalable systems. Proficient in Python and Java with hands-on experience building AI-powered applications, machine learning solutions, and cloud-based projects. Passionate about problem-solving, data structures, algorithms, and developing impactful software products. Seeking opportunities to contribute to large-scale engineering challenges while continuously learning and growing as a software developer.

EDUCATION

JSS Academy of Technical Education, Bengaluru Bachelor of Engineering in Electronics and Communication Engineering CGPA: 8.4/10	Sep 2023 – Present
Kumarans Composite PU College Percentage: 92.83%	2022 – 2023
Prarthana Central School Percentage: 91.17%	2020 – 2021

RELEVANT COURSEWORK

- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems
- Operating Systems
- Computer Networks
- Artificial Intelligence
- Cloud Computing

EXPERIENCE

TATA Group – Forage Virtual Job Simulation <i>Generative AI Powered Data Analytics</i>	May 2024 – Jun 2024
• Completed a virtual job simulation focused on Generative AI applications in data analytics. • Performed data cleaning, visualization, and insight generation from business datasets. • Applied AI-assisted analytical techniques to support business decision-making.	

PROJECTS

Heart Disease Prediction Using Machine Learning

- Built a machine learning model to predict heart disease risk using healthcare data.
- Performed data preprocessing, feature engineering, and exploratory data analysis.
- Implemented Logistic Regression, Random Forest, and KNN models.
- Achieved over 83% accuracy using Random Forest classification.

BrainWatch: Real-Time Seizure Detection and Prediction Using EEG

- Developed an EEG-based seizure detection and prediction system using machine learning techniques.
- Processed CHB-MIT EEG dataset and extracted signal features for classification.
- Implemented Random Forest-based seizure prediction pipeline.
- Designed FPGA-compatible architecture for real-time deployment.

Microwave Radar Intrusion Detection System

- Developed an intelligent security system using ESP32, RFID, PIR, IR, and LD2420 mmWave radar sensors.
- Implemented access control, intrusion detection, and real-time alert generation.
- Integrated LCD display, buzzer, and GSM communication for monitoring and notification.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

AI / Machine Learning: Scikit-Learn, Pandas, NumPy, Machine Learning

Cloud & Tools: AWS, Git, GitHub, VS Code, Jupyter Notebook

Web Technologies: HTML, CSS

ACHIEVEMENTS

- Completed AWS Skill Builder Cohort 3.
- Completed Infosys Springboard Pragathi Path to Future Cohort 6.
- Built multiple AI and Machine Learning projects focused on solving real-world problems.
- Actively strengthening problem-solving skills through Data Structures and Algorithms practice.

CERTIFICATIONS

- AI Primer Certification
- Computer Vision
- Cloud Computing
- Deep Learning For Developers
- Infosys Springboard Pragathi Path to Future Cohort 6
